### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The claimed invention is a waterborne copolymer dispersion comprising alkenyl functional dendritic polymer formed from a dendritic core polymer specified in the claims and having at least one alkenyl functional compound bonded to said core polymer, and wherein alkenyl functional dendritic polymer is copolymerized to a polymer backbone of at least one homo or copolymer obtainable by polymerization in an aqueous medium of at least one polymerisable allyl, vinyl, maleic or diene monomer.
2. While reference of record to Duff et al Patent 5,332,640 discloses a core dendrimer having three or four arms having terminal functional groups, Duff does not disclose that a dendrimer has at least one alkenyl functional group such that said alkenyl functional dendritic polymer is copolymerized to a polymer backbone via alkenyl functionality by the emulsion polymerization technique. Other references of record to Grandhee Patent 6,683,145 and Southwick et al Patent 5,292,795 also do not disclose a dendrimer having at least one alkenyl functional compound on said dendrimer core such that the resulting dendritic polymer is copolymerized to a polymer backbone via alkenyl functionality using emulsion polymerization process. These references do not disclose the specified dendritic polymer in the present claims.
3. Claims 1-29 are deemed contain allowable subject matter.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
